“65 Years of the Experience”

CANCAN production center was established in 1958 by Salih Özüüçürlü in Ankara, specializing initially in the repair of orange juicers and kitchen appliances, and later expanding into machine manufacturing to serve the food industry. In 1984, Tunç Özüüçürlü took over the management as the second-generation representative and continues to lead the business. In 1994, he obtained the trademark registration for the company. Located in the İvedik Organized Industrial Zone in Ankara, the company has been continuing its production in Sakarya since the year 2000.

CANCAN, placing great importance on exports, continues to explore new markets by directly exporting 50% of its production to 55 countries across 5 continents.

Prioritizing research and development and allocating a significant portion of its annual turnover to R&D activities, CANCAN competes with global brands with its innovative equipment. The primary goal is to become a sought-after brand with world-class quality. With its product variety and quality, CANCAN specializes in the industrial kitchen sector, serving establishments such as hotels, restaurants, cafes, bakeries, schools, and factory kitchens.

Operating in its 5,500 square meter production facility in Sakarya today, CANCAN manufactures manual and automatic citrus juicers for oranges, pomegranates, grapefruits, and lemons, as well as washing equipment, manual and electric can openers, fruit and vegetable slicing machines, and peeling machines. The production involves shaping metal through processes such as aluminum casting, plastic injection, painting, mold production, manufacturing, and assembly, all done using CNC lathes and mills under one roof for all products.
